

Hatimee Glass

PARTITION

Aluminium Section Partitions from Hatimee Glass is the ace product in the market. The present concept of modular design in office and commercial establishments have offered a wide scope of applications for use of aluminium extruded sections in Door and Partitions.

The high price of wood has resulted in several homeowners switching to metal doors and windows. Not only are they strong and durable enough to hold glasses in place, but are also extremely functional, maintenance free, while seamlessly complementing the clean lines of contemporary design. Aluminium partition and door designs are a popular choice for modern partitions and doors owing to a wide range of customizable designs and patterns as they can be designed in any shape easily with minimum wastage.

Advanced patterns, multiple specifications, reasonable price and ultimate superiority makes these partitions highly attractive and applicable for customers. According to the need of the client these partitions can be customised and designed and redesigned again and again.

These partitions can be broadly classified into 2 categories-

CLASSIFICATIONS

Glass or Glazed Partitions-

Glass partitions have become a favourite office option. Glass is an excellent material to use as it is easy to clean and it is transparent, adding an elegance and sunlight to an office. These partitioning systems provide frameless appearance to the office interior and are also extremely attractive.

With a choice of curved, straight, single and double glazed options, this system can be designed to produce a unique office space to suit client's requirements. Using a minimum number of aluminium framing sections, this partitioning system provides an office divide that allows unhindered vision whilst maintaining the privacy of individual offices.

With 10, 12 or 15mm toughened glass, depending on the height of the partition; the glass can be tinted if required, and jointed using silicone or a dry joint system.

Any vinyl, manifestation can be applied to the glass. These can be used to simply highlight the presence of the partitions, create individual designs or incorporate logos.

Semi Glazed Partitions-

This is the most cost effective and flexible solutions of the partitioning ranges. Whilst quick and easy to install, Aluminium partitions prove themselves to be very durable, demountables & relocatable. This system provides up to one hour fire performance and high levels of sound reduction.

Aluminium Partitions are available in solid, part or fully glazed elevations. These can be designed to have wooden panels (Nova-pans) or Aluminium Partition Panels (APP) at the bottom and glass on the top thus obstructing the vision from bottom. They provide better privacy.

These partitions can be built on site with very little disturbance to the masonry and being very light, reduce the load on the structure.
