PANAMA
PEST CONTROL COMPANY

MAKING A
VISIBLE
DIFFERENCE

CREATING HEALTHY FAMILIES
THROUGH HEALTHY PEST MANAGEMENT

Bed Bugs

- Bed Bugs are very elusive and manifold pests.
- They are hitchhikers.
- Gains access to people through cinema halls, hotel rooms, laundry, luggage, beddings, domestic servants, etc.
- Feeds primarily on the blood of humans, this flat tiny insect hides near sleeping and sitting areas.

Integrated Bed Bugs Management Treatment

- Conventional or Odourless spray process by targeting their breeding & harbourage areas in headboards, mattress, boxspring, bed frame, upholstered furniture, etc.

Rodents (Rats)

- They spread many diseases like Plague, Rat Bite Fever, Leptospirosis.
 - Threaten almost every aspect of daily lives; they contaminate our food, cause structural damage, damage clothes, destroy commodities & packaging, damage equipment, spread pathogens and negatively impact our general health.
- Most significant and destructive pests in the world.
- They invade in our premises in search of food and shelter and in doing so become a serious nuisance.
 - House mouse, Roof Rat, Bandicoot Rat & Norway Rat are commonly found rats.

Integrated Rodent Management Treatment

- Inspection of the premises-interior & exterior areas
- Strategically carry out treatment through Baiting and Non-toxic Glue Traps process.
- Guidelines to seal the Rodent Entry Points.
- Placing the Tamper Proof Metal Baiting Stations (If required)

Wood Borer

- Yellow powder or frass falling from holes in wooden furniture is a clear sign of wood Borer infestation.

Integrated Wood Borer Management Treatment

- Injecting heavy dose of Conventional/Odourless concentrated chemical through syringe in the holes made by the borer & then after sealing them.

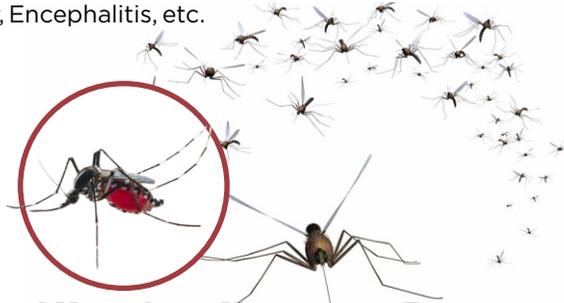

Flies & Mosquitoes

Flies

- Flies are one of the major disease transmitters.
- They transmit disease pathogens: - Typhoid fever, Cholera, Diarrhea, Dysentery, Tuberculosis, etc.

Larvae/Mosquitoes

- The mosquito brings diseases and death
- They breed in stagnate water.
- Spreading many diseases like Malaria, Dengue, Yellow Fever, Encephalitis, etc.

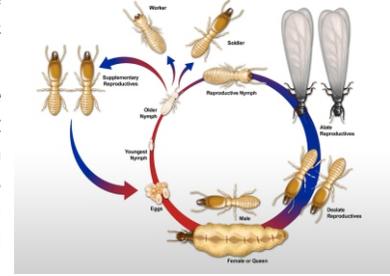

Integrated Mosquitoes Management Treatment

- Inspection of site and surrounding areas.
- Spraying of larvicides - Killing the mosquitoes before they mature.
- Fogging process - Controlling adult mosquitoes for immediate relief.

We have time and again succeeded in providing a mosquito free environment through our effective pest management approach.

Termites (White-Ants)

- Cause major damage to the building & property of mankind
- They are one of the oldest insect present on earth they feed on cellulose which is present in wood and all kinds of wood based products.

When dealing with termites; prevention is better than cure.

Integrated Termite Management Treatment

Pre Construction Soil & Foundation Subterranean Termite Treatment (10 Years Warranty)

- Foundation of the Structure is treated as per the specification laid by Indian Standard Code for new construction.

Post Construction Subterranean Termite Treatment (5 Years Warranty)

- Injection and Odourless spray treatment is carried out to the Entire Structure - Perimeter walls + Common Areas + Individual Units.

Individual Premises Treatment(Annual Contract)

- Injection & Odourless spray process to the skirting level of the premises, wooden door frames, fixtures and furniture's attached to the walls.

Renovation of Individual Premises Treatment (2 Years Warranty):

- Four Stages of treatment: Skirting, Flooring, Walls & Ceiling are thoroughly treated.
- Combining it with the wood protective treatment is recommended as it is an ideal stage to protect your premises form Termites & Borers.
