The use of glass has changed dynamically over the years. While, in the past it was essentially looked upon as a constituent allowing air and light inside our homes and buildings, in the modern concept of design and architecture, it's role goes way beyond these primary functions. Rapid changes in glass production and technology has facilitated availability of newer forms of glass to architects and planners. It is now considered as a core structural and design element and requires equally skillful knowledge and implementation.

Dubai Glass Industry more popularly known as DGI is proud to be one such proficient players in this field. Established in 1972, we now have a presence in Kenya, Egypt and India too.

Our comprehensive presence in all aspects related to glass industry viz. production, retailing, contracting and design makes us one of the most resourceful company to deal with, for all your glass needs.

Apart from being a leading architectural facade specialist in the region DGI is also a leader in-

- **High performance window systems.**
- **Interior decorative glazing.**
- **Marine certified ship/yacht windows and doors.**

DGI caters to a wide spectrum of clients which include Consultants, Interior Designer and Decorators, Builders and Contractors, Shipbuilders and Yacht Manufacturers, Hospitality Industry and anyone with a requirement of glass.

A professional and well trained team at our command, an uncompromising attitude towards quality, and a high regard for timely delivery and services, has earned us respect and loyalty of our clients and an accrediting with ISO 9002 Certification for excellence.
