Commercial Software development. Systems Integrator, E-commerce and Turnkey

COMPANY PROFILE:

Raj Information Systems Pvt. Ltd. RAJINFOSYS is a Mumbai based Company established in 2004. RAJINFOSYS is positioned as a Software & Web Development and Implementation Company, successfully designed and implemented a number of projects in Commercial Applications Development in India.

RAJINFOSYS has delivered and integrated complex, mission critical systems across key market segments. The Company provides an all-embracing portfolio of services from strategic consultancy and products through to systems integration, solutions and business outsourcing.

We implement solutions that enable our customers to meet the challenges of the changing marketplace and exploit the full potential of the technologies of tomorrow. We keep up to date with technology and its application. We have a range and depth of skills and experience for our clients having wide ranging needs.

We have a structured approach to developing our team. A team is formed for each project, including people with the skills and experience you need. Our best-in-class infrastructure and facilities foster offshore, marine projects and businesses.

At present RAJINFOSYS Software Solutions employs dedicated staff in all IT segments be it applications development and implementation, Systems integration and e-commerce. The company has restructured itself into two major divisions namely Business Solutions and Customized Software development.

KEY FOCUS AREAS:

- CMS Website Designing & Static (Flash) Website
- E-commerce Development with Payment Gateway
- Enterprise Resource Planning (ERP)
- E-Book / Catalogue Designing
- Customized Software Development
- Google Sponsored Link Advertisement
- Search Engine Optimization (SEO)
- Legacy system migration and Business Processes Re-engineering
- Consulting in Applications Design and Development, Implementation of successful LAN/WAN connectivity solutions.

We welcome any inquiries related to legacy systems maintenance, troubleshooting and Re-engineering processes along with migration to client/server software or web-based Applications.
